SKILLS

- **Programming Languages:**
  JAVA, C, Python
- **Web Technologies:**
  HTML , CSS , Javascript
- **DataBase :**
  MS SQL, MySQL / SQLite, Oracle
- **FrameWorks:**
  Angular, Django, SpringBoot, Bootstrap, Tkinter
- **Tools:**
  GitHub, VS Code, Intellij

ACHIEVEMENTS

- 6 star rating in problem solving in hacker rank.

CO-CURRICULAR ACTIVITIES

- Participated in Flipkart Grid 5.0
- Participated in TSEC NeedForCode 2.0 Hackathon , highlighting coding proficiency.
- Participated in TSEC Codenaissance Hackathon.

EDUCATION

VESIT - B.E Computer Engineering (sem I - sem V)
CGPA: 9.4   2021-2025
Smt CHM College - Higher Secondary School (HSC)
Percentage: 88.33%   2021

Jhulelal Trust School - Secondary School (SSC)
Percentage: 81.80%   2019

WORK EXPERIENCE

Pixolo Productions (Front End Developer Intern)
                                    Nov 2023 - Present
- Employed Gulp and SCSS for streamlined development, enhancing project workflows.
- Utilized Next.js to craft dynamic user interfaces, applying advanced React state management for optimal performance.

PROJECTS

E-commerce Website
Tech Stack - HTML , CSS, JavaScript , Django, MS SQL
- Designed an intuitive user interface for easy product browsing and selection.
- Implemented a streamlined cart and ordering system for seamless customer transactions.
- Utilized Google APIs for hassle-free and secure user login and authentication.
- Integrated Razorpay Django library to enable secure payment processing.

Medium : A blogging website
Tech Stack - Angular, SpringBoot , MS SQL
- Developed a user-friendly platform with UI, authentication, and CRUD features for effortless blog management.
- Enhanced user engagement with like, comment, and deletion features, fostering an interactive community.
- Implemented robust login authentication to ensure data security and privacy for users.

Sorting Visualizer
Tech Stack - HTML , CSS , BootStrap , JavaScript
- Designed an intuitive UI for easy algorithm selection and visualization.
- Included a variety of sorting algorithms for users to explore including bubble, merge & quick sorts
- Empowers users to adjust the animation speed, tailoring their sorting algorithm visualization experience.

Inventory management System
Tech Stack - Python , MySQL
- Secured login and registration for suppliers and manufacturers.
- Developed efficient product search functionality.
- Enabled cart-based order placement for suppliers.
- Manufacturers can add, update, and delete products for streamlined inventory control.
- Improved sales data analysis through graphical representations.
